OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION,

May 31, 2011

Mr. Erik W. Johansen
Special Pesticide Registration Program Coordinator
State of Washington Dept. of Agriculture
P.O. Box 42560
Olympia, WA 98504-2560

Subject: Registration Action Under Section 24(c) of the Federal Fungicide, Rodenticide and Insecticide Act to revise labeling for the use of Prozap Zinc Phosphide pellets (EPA Reg. No. 61282-49) on cottonwood/hybrid poplar plantations and adjacent non-crop areas to control voles.

EPA SLN No. WA-050016
Submission Date: May 4, 2011

Dear Mr. Johansen,

This will acknowledge receipt of your notification to the Agency of a registration, pursuant to Section 24(c) of the Federal, Insecticide, Fungicide, and Rodenticide Act, as follows:

Product	Zinc Phosphide
EPA Registration Number	61282-49
24(c) Registrant:	HAACO, Inc. 110 Hopkins Drive Randolph, WI 53956

The Agency has determined that the subject amendment to the Special Local Need (SLN) registration as requested for the revision of labeling to be consistent with Federal label, and with current WSDA requirements is acceptable.

If you have any questions please contact Princess Campbell at (703) 308-8033.

Sincerely,

John Hebert
Acting Branch Chief
Risk Integration, Minor Use and Emergency
Response Branch
Registration Division (7505P)

RE: EPA SLN Reg. Number WA-050016

Dear Debra,

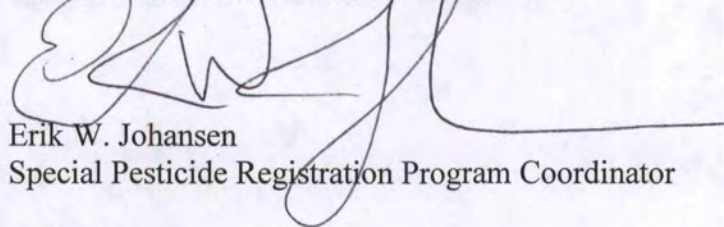

Enclosed is revised labeling for Washington Special Local Need (SLN) registration number WA-050016 issued to HACCO for the use of Prozap Zinc Phosphide Pellets (EPA Reg. No. 61282-49) on cottonwood / hybrid poplar plantations and adjacent non-crop areas to control voles.

This SLN registration was revised to be consistent with the federal label, and with current WSDA requirements. The SLN registration will expire on December 31, 2016.

If you have any questions, please contact me at (360) 902-2078 or by e-mail at ejohansen@agr.wa.gov.

Sincerely,

PESTICIDE MANAGEMENT DIVISION

Erik W. Johansen
Special Pesticide Registration Program Coordinator

enclosures

cc: Jennifer Seifert, HACCO

RESTRICTED USE PESTICIDE

DUE TO HAZARD TO NON-TARGET SPECIES

For retail sale to and use only by certified applicators or persons under their direct supervision and only for those uses covered by the certified applicator's certification.

SUPPLEMENTAL LABELING

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

Prozap[®] Zinc Phosphide Pellets

EPA Reg. No. 61282-49
EPA SLN No. WA-050016

DIRECTIONS FOR USE:

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, and precautions on the EPA registered label.

CROP / SITE:

- Cottonwood / hybrid poplar plantations and adjacent non-crop areas.

PESTS:

- Meadow voles (*Microtus pennsylvanicus*), mountain voles (*M. montanus*), long-tailed voles (*M. longicaudus*), and Oregon voles (*M. Oregoni*).

APPLICATION METHODS/RATE/TIMING:

- **Broadcast Baiting:** This product may be applied broadcast by aircraft, cyclone seeders, or by hand. When applying bait by hand (wear rubber gloves during hand broadcast applications) throw tablespoon amounts into heavy cover along the tree rows. Apply bait at rates of 5 to 10 pounds of bait per acre. Apply the product where infestations are known to be present and where there is sufficient cover to hide the pellets from plain view.

RESTRICTIONS / PRECAUTIONS:

- Do not apply to bare ground.
- This product is toxic to wildlife and fish. Birds and other wildlife feeding on treated pellets may be killed. Do not apply to open ground, roads and areas in which no vegetation occurs. Pick up and properly dispose of all spilled toxic pellets. Do not apply this product directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply where runoff from this product will enter an aquatic system. Do not contaminate water when disposing of equipment washwaters. Check for and dispose of excess or spoiled pellets and carcasses daily until the pellets are expended or are removed.

- Prozap[®] Zinc Phosphide Pellets should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Endangered Species Program web site at <http://agr.wa.gov/PestFert/NatResources/EndangSpecies.aspx>, or contact the Washington Department of Fish & Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Service for information on listed threatened or endangered species. Consult the federal label for additional restrictions and precautions to protect listed species.
- Do not use this product within one mile of the known range of the pygmy rabbit (*Brachylagus idahoensis*). The pygmy rabbit is known to occur in southern Douglas County and may occur in northern Grant County.

WSDA CONTAINER DISPOSAL GUIDANCE:

Completely empty the contents of the paper container into application equipment, and apply to a labeled crop or site. The empty container may be disposed of in a sanitary landfill. Burning is not a legal method of container disposal in Washington.

This label for Prozap[®] Zinc Phosphide Pellets expires and must not be distributed or used in accordance with this SLN registration after December 31, 2016.

RE: EPA SLN Reg. No. WA-050016

Enclosed is Washington Special Local Need (SLN) registration number WA-050016 issued to HACCO for the use of Prozap Zinc Phosphide Pellets (EPA Reg. No. 61282-49) on cottonwood / hybrid poplar plantations and adjacent non-crop areas for control of voles (*Microtus* spp.). This registration was issued under authority of Section 24(c) FIFRA.

This SLN registration is being issued as an eventual replacement for SLN registration number WA-950022 issued to HACO for the use of Prozap Zinc Phosphide Pellets (EPA Reg. No. 2393-521) on cottonwood / hybrid poplar plantations and adjacent non-crop areas for control of voles (*Microtus* spp.). Label directions and use rates for WA-050016 are consistent with WA-950022, and precautionary statements for WA050016 are consistent with current WSDA requirements.

Zinc phosphide is highly toxic to very highly toxic to small mammals, and highly toxic to birds. This is a concern in Washington, since the pygmy rabbit (*Brachylagus idahoensis*) is listed as an endangered species (federal and state). To address this concern, WSDA has required specific restrictions on the SLN label to protect the pygmy rabbit and other non-target organisms.

Tolerances are not required for this SLN registration, since the use of zinc phosphide on cottonwood / hybrid poplar plantations and adjacent non-crop areas is a non-food and non-feed use.

WSDA has issued this SLN registration with an expiration date of December 31, 2010.

SUBJECT: APPLICATION FOR PESTICIDE AMENDMENT – NON-PRIA ACTION
Submission of Alternate Confidential Statement of Formula
J.T. Eaton Bait Block Rodenticide with Peanut Butter Flavorizer; EPA Reg. No. 56-42

Dear Mr. Hebert:

Enclosed, please find an alternate confidential statement of formula for the above-subject product. We are submitting this application to make a direct substitution of red millet with white millet. Due to major crop failure, red millet will not be available for 2013 production. White millet will be in short supply but should be available in sufficient quantities to satisfy our production requirements.

We do not believe this substitution will affect the physical/chemical properties, acute toxicity or efficacy of the formulation as the two ingredients are very similar and comprise less than 10% of the formula.

We request expedited review in order to plan production for the upcoming year. Thank you in advance for your attention to this matter. If you have any questions, please do not hesitate to contact me at (636) 942-2583.

Sincerely,

Sharon M. Johnston
Regulatory Consultant
Agent for J.T. Eaton & Co., Inc.

Attention: Ms. Sharon M. Johnston

Subject	J.T. Eaton TM Bait Block [®] Rodenticide with Peanut Butter Flavorizer TM EPA Reg. No. 56-42 Changes to Use Restrictions (100 Foot Restriction) Your amended application of July 18, 2012
Purpose	This submission updates the text to conform to the revised Risk Mitigation Decision for Ten Rodenticides, under sec 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).
Label	The labeling submitted with the above letter is acceptable, provided you submit one (1) copy of final printed labeling to us, before you ship your product.
Existing stocks	The registrant may distribute or sell existing stocks of this product with current labeling for eighteen (18) months from the date of this letter.
Consequence for non-compliance	If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Questions

If you have questions about this letter, please contact Dan Peacock at 703-305-5407 (phone) or peacock.dan@epa.gov (E-Mail).

Sincerely,

A handwritten signature in black ink, appearing to read "John Hebert", with a large, stylized loop at the beginning.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Keep away from children, domestic animals and pets.

Personal Protective Equipment (PPE):

All handlers (including applicators) must wear long-sleeved shirt, long pants, shoes, socks and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

User Safety Requirements:

- Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing.
- As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

FIRST AID

Have the label with you when obtaining treatment advice.

If Swallowed	<ul style="list-style-type: none">• Call a poison control center, doctor or 1-800-222-1222 immediately for treatment advice.• Have person sip a glass of water if able to swallow.• Do not induce vomiting unless told to by a poison control center or doctor.
If on Skin or Clothing	<ul style="list-style-type: none">• Take off contaminated clothing.• Immediately rinse skin with plenty of water for 15-20 minutes.• Call a poison control center, doctor or 1-800-222-1222 immediately for treatment advice.
If in Eyes	<ul style="list-style-type: none">• Hold eye open and rinse slowly and gently with water for 15-20 minutes.• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.• Call a poison control center, doctor or 1-800-222-1222 immediately for treatment advice.

TREATMENT FOR PET POISONING

If animal eats bait, call a veterinarian at once.

NOTE TO PHYSICIAN OR VETERINARIAN

Anticoagulant Diphacinone: If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. **For humans or dogs** that have ingested this product and/or have obvious poisoning symptoms (bleeding or prolonged prothrombin times), give Vitamin K₁ intramuscularly or orally.

Environmental Hazards

This pesticide is toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL. Read this entire label and follow all use directions and use precautions. Use only for sites, pests and application methods described on this label.

IMPORTANT: Do not expose children, pets or other non-target animals to rodenticides. To help prevent accidents:

1. Store product not in use, in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife or in "tamper-resistant" bait stations. These stations must be resistant to destruction by dogs and by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears or other potentially destructive animals or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled and unconsumed bait as specified on this label.

Note: Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait states must be used if children, pets, non-target mammals or birds may access the bait.

USE RESTRICTIONS

This product can only be used to control Norway rats, roof rats and house mice *in and within* 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port of terminal buildings and related structures around and associated with these sites. Fence and perimeter baiting, beyond 100 feet from a structure as defined above, is prohibited. Do not place near or inside ventilation duct openings. This product must not be applied directly to food or feed crops. Do not contaminate water, food, feedstuffs, food or feed handling equipment or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA-inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait. Do not use in sewers. Burrow baiting with this product is prohibited.

Do not sell this product in individual containers holding less than 4 pounds of bait.

SELECTION OF TREATMENT AREAS

Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, beside burrows, in corners and concealed places, between floors and walls or in locations where signs of rodents have been seen. Protect bait from rain or snow. Remove as much foodstuff as possible from the area to be baited.

APPLICATION DIRECTIONS

Rats: Apply 2 to 8, two-ounce blocks (4 to 16 ounces) per placement. Space placements at intervals of 15 to 30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until fresh signs of rat activity cease to appear.

Mice: While wearing waterproof gloves, break each 2 oz. block into 3 pieces and place 1 or 2 pieces at 8 to 10 foot intervals. Larger placements (up to 3 pieces (2 oz.)) may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until fresh signs of mouse activity cease to appear.

Follow-up: Replace contaminated or spoiled bait immediately. Wearing waterproof gloves, collect and dispose of all dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborages as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish with fresh bait as often as needed.

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

Pesticide Disposal: Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

Container Handling: Non-refillable container. Do not reuse or refill this container.

[Plastic] Offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or by incineration.

[Paper] Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration.

NOTICE: To the extent consistent with applicable law, buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

Re: Fw: Labeling Comments on 56-42, 56-58, 56-70, 56-74

SJohns1825 to: Dan Peacock

09/05/2012 04:37 PM

Dan,

Attached are revised labels incorporating your changes for each of the listed products. I did make one additional change to the 56-74 label. I deleted the sentence immediately after "...as defined, is prohibited." that states "This product is especially suited for wet or damp areas." In discussions with J. T. Eaton after submitting these, it was determined that this statement is not appropriate for this formulation.

Please let me know if you need anything further.

Thanks!

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL. Read this entire label and follow all use directions and use precautions. Use only for sites, pests and application methods described on this label.

IMPORTANT: Do not expose children, pets or other non-target animals to rodenticides. To help prevent accidents:

1. Store product not in use, in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife or in "tamper-resistant" bait stations. These stations must be resistant to destruction by dogs and by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears or other potentially destructive animals or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled and unconsumed bait as specified on this label.

Note: Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait states must be used if children, pets, non-target mammals or birds may access the bait.

USE RESTRICTIONS

This product can only be used to control Norway rats, roof rats and house mice in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port of terminal buildings and related structures around and associated with these sites. Fence and perimeter baiting, beyond 100 feet from a structure as defined above is prohibited. Do not place near or inside ventilation duct openings. This product must not be applied directly to food or feed crops. Do not contaminate water, food, feedstuffs, food or feed handling equipment or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA-inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait. Do not use in sewers. Burrow baiting with this product is prohibited.

Do not sell this product in individual containers holding less than 4 pounds of bait.

SELECTION OF TREATMENT AREAS

Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, beside burrows, in corners and concealed places, between floors and walls or in locations where signs of rodents have been seen. Protect bait from rain or snow. Remove as much foodstuff as possible from the area to be baited.

APPLICATION DIRECTIONS

Rats: Apply 2 to 8, two-ounce blocks (4 to 16 ounces) per placement. Space placements at intervals of 15 to 30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until fresh signs of rat activity cease to appear.

Mice: While wearing waterproof gloves, break each 2 oz. block into 3 pieces and place 1 or 2 pieces at 8 to 10 foot intervals. Larger placements (up to 3 pieces (2 oz.)) may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until fresh signs of mouse activity cease to appear.

Follow-up: Replace contaminated or spoiled bait immediately. Wearing waterproof gloves, collect and dispose of all dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborages as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish with fresh bait as often as needed.

IMPORTANT: Do not expose children, pets or other non-target animals to rodenticides. To help prevent accidents:

1. Store product not in use, in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife or in "tamper-resistant" bait stations. These stations must be resistant to destruction by dogs and by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears or other potentially destructive animals or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled and unconsumed bait as specified on this label.

Note: Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait states must be used if children, pets, non-target mammals or birds may access the bait.

USE RESTRICTIONS

This product may can only be used for to control of Norway rats, roof rats and house mice in and around within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port of terminal buildings and related structures around and associated with these sites, and similar man-made structures. Fence and perimeter baiting, beyond 100 feet from a structure as defined above is prohibited. Do not apply further than 50 feet from buildings. Do not place near or inside ventilation duct openings. This product must not be applied directly to food or feed crops. Do not contaminate water, food, feedstuffs, food or feed handling equipment or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA-inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait. Do not use in sewers. Burrow baiting with this product is prohibited.

Do not sell this product in individual containers holding less than 4 pounds of bait.

SELECTION OF TREATMENT AREAS

Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, ~~in or~~ beside burrows, in corners and concealed places, between floors and walls or in locations where signs of rodents have been seen. Protect bait from rain or snow. Remove as much foodstuff as possible from the area to be baited.

APPLICATION DIRECTIONS

Rats: Apply 2 to 8, two-ounce blocks (4 to 16 ounces) per placement. Space placements at intervals of 15 to 30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until fresh signs of rat activity cease to appear.

Mice: While wearing waterproof gloves, break each 2 oz. block into 3 pieces and place 1 or 2 pieces at 8 to 10 foot intervals. Larger placements (up to 3 pieces (2 oz.)) may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until fresh signs of mouse activity ~~cease to appear~~.

Follow-up: Replace contaminated or spoiled bait immediately. Wearing waterproof gloves, collect and dispose of all dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborages as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish with fresh bait as often as needed.

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

Pesticide Disposal: Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

Container Handling: Non-refillable container. Do not reuse or refill this container.

[Plastic] Offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or by incineration.

[Paper] Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration.

NOTICE: To the extent consistent with applicable law, buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

SUBJECT: Submission of Revised Labeling per EPA Rodenticide memos dated March 14 & March 20, 2012
J.T. Eaton Bait Block Rodenticide with Peanut Butter Flavorizer; EPA Reg. No. 56-42

Dear Mr. Peacock:

Enclosed, please find 5 copies of revised draft labeling for the above-subject product. I have included a marked copy to facilitate review. These label changes are being made in response to the subject memos revising certain language required by the rodenticide risk mitigation decision.

If you have any questions, please do not hesitate to contact me at (636) 942-2583.

Sincerely,

Sharon M. Johnston
